

Houston Episode 3

Welcome back everyone to hang with Huey Um I just wanna say a special shout out to Twin Bridge Sports as well as studio place for making this happen They do a lot so everybody go give them a follow Um They make this podcast happen Um Today I'm joined with two of my roommates two of my brothers two of my closest friends I have Jon Porter and David Major They both play on the basketball team with me Um You know we we go to class together we do a lot together we do everything together So um you know Jon is from Columbia Missouri and David is from Englewood New Jersey So they're not really from California They have their own kind of slang on kind of feel Um But I kinda want to get into that a little bit So what brings you guys out here Um I'll start with Jamal What brings you to Pepperdine Why'd you choose Pepperdine And uh what do you what do you like about it so far Uh The reason I came Pepperdine obviously on the basketball team came here for basketball but uh coach Romar him and my dad have had a very close friendship for a really long time Actually they go way back So I've been always been pretty close with uh Coach Romar Actually two of my brothers recommended to play for him when he was back at U Dub My dad was coaching with him there So yeah for me it was basically wherever he's at I was probably gonna go Awesome Yeah similar I mean I really liked Romar Um I had known him through like my a U coach and like a couple of other um friends and stuff like that and uh yeah it was mainly because of him and uh just being in Malibu too I mean like what kid from New York doesn't want That is a good point I forget you're from all the way out there It's weird to think how we all come from different places because it feels like we've been living together We've known each other our whole life Yeah So um with that I mean we play basketball every day the whole year Um I love basketball I know y'all love basketball So who are some of your favorite players Like growing up watching um someone you made me model your game after Um Well obviously other than my brothers my sisters my parents um favorite players I would say probably oh I just like watching great players like KD Ron Seth all those dudes But yeah I really watch KD a lot Um I'll say he's probably the main one I I watch most Yeah I got a group on I love just watching great players in general I mean for me I love like Prime James Harden Like I love guys like that I love the book I love watching his game and stuff like that And I was just try and like um another guy who I sometimes watch when I was younger is like Jamal

Crawford guys like that and I would just try and like take little things from their game and just like try and put them in my bag and stuff like that So I mean yeah I just love guys that can get a buck too so that's awesome Um I guess I'll answer the question for everybody out there I mean they already know Stephen Curry all the way I love Curry He's the second greatest player ever but I love I love Steph a lot Um You know with that you know we we do go to school as well as play basketball and we also also try and have a social life So how do you how do you guys balance the academic piece with the athletic piece and having to practice 3 to 4 hours a day as well as with class Uh I mean it's pretty tough especially at Pepon because Pepon like the school ain't no job that it is hard but it is rigorous I mean I feel like I have a pretty close circle So and like I feel like the main people I'm really hanging out with is y'all the rest of the teammates So for me it's just like I'm around y'all all the time So you guys really are the only part especially out here part of my social life So that with school it's just I don't know I feel like it's kind of pepper I kind of like its own little village I feel like it's kind of secluded so I'm just there most of the time But yeah it's a hard balance for sure Yeah like V said I mean it's a tough balance but I mean as a division one athlete that's kind of what you sign up for You know it's like you got school you got basketball you got your social life and everything So I mean like I think you know we get through it obviously and it's you know good But yeah I mean we yeah we get through it you know I mean I think I think it's interesting because you wake up I have class at eight pretty much every day except for Wednesday and then a lift at 10 and I'm not leaving the gym facility until like around four and then depending on the day I might have class after So it's a long day Um you know with that kind of want to get some interesting stuff So it yeah uh like the social life right Like there's this there's this perception that that that uh goes on and that goes around talks about what a college athlete or like the d one athlete kind of um how he how he acts and how he is um around you know girls or whatever it may be Uh like what do y'all think about that Because I feel like I feel like we have some really good guys on the team We do got a bunch of good guys but uh everybody on our team is really a great guy But I feel like oh no everybody gonna have stereotypes and certain perceptions looking from the outside in But yeah like you said I feel like we got a good group of guys on the team and especially for me my experience in college has not at all been like I feel like what people think of when they think of like a demon athlete I feel like with us it's like like V said I don't think we've really had like a normal like college experience and I'm

not even complaining either Like I I love like being api love like kind of like the life we live and stuff like that I agree man I feel like you know I think with social media right Le let's talk about social media a little bit you know I feel like our generation kind of has has it all backwards um Versus our parents' generation and then you know even before our parents' generation um you know man like we see on social media all the time like you shouldn't treat you shouldn't care too much essentially right But like I come from there my my parents raised me you know you you knock on her door and get her some flowers you know and ask her out like you know what I mean Like how they used to come home after work and see their wife and hug her and stuff like that That's kind of that's what I like I'm a I'm a caring person I care a lot a lot a lot a lot What do y'all what do y'all think about that Why why is it that you know people like who they can't have or why is it that you know like caring too much nowadays I mean what what is it like I mean you just told me the other day you can see who half swipes your stuff on Snapchat That's crazy You know what The media is a crazy thing I feel like social media kind of like I don't know if it was like I think guys like us were born in the wrong generation really cause like you know I do care I like to care and stuff like that and I don't like to like play that like game so to speak that like you know you know it's like match energy and and and like you know whatever It's like bro I I like to care I like to you know talk to you and stuff like that So I mean I don't know I think social media can like mess a lot of stuff up Um but yeah uh I feel like it's tough because like yeah I feel like a lot of people it's I don't know it's weird like they don't want you to care or like tell you you shouldn't care or whatever But I feel like that's more because a lot of people also have a really big ego and it's like they don't wanna be like get embarrassed like not fab is but I feel like if you're not caring I'd rather care and get like hurt than not care and like never have nothing genuine switch up like who I am somebody else You should never That's just bro I just think it's important like whatever you do in life whether it's I mean we play basketball every day whether you're an accountant whether you're a pharmacist whether you're a doctor whatever you do right If you care about something you're passionate about something why not give it everything you have And I just think it's weird to like go through life like my purpose What I think the purpose of life is to be able to influence impact people like that is important be able to like cause at the end of the day nothing you accomplish There's a quote by Maya Angelou that says like people forget like what you accomplish People forget what you've done but

they'll never forget how you made them feel So like making people feel something is important So I just think it's interesting how yeah Well it's the fantasy group chat He's big on fantasy We're big on fantasy It's the playoffs this week So it should be pretty every day Yeah So but I I just think why not care why not care So like I mean both of you guys right now are single men I'm taking I love you cadence I miss you I love you baby But um with that like what are the qualities you look for in a person that y'all wanna date First and foremost you gotta love the Lord Flamingo Yeah I gotta find me a girl that loves the Lord But other than that I would say a girl that I can just like vibe with like doing little things you know like they don't always gotta be some crazy whatever it is but someone that's just fun to be around someone that's um easily you know they're like real cool with my family They get along with my family real well Uh But yeah some of that's just like fun to be around whatever it is that we're doing Yeah I would say like I gotta be able to vibe with you if I can't vibe with you then like you know I can't really be with you but I mean I would also say you know gotta have like she kinda has to like match my energy a little bit you know And um I'd also have to say she has to have a sense of humor I like to joke around a lot I like to you know jokes and stuff like that So she's got to have a good sense of humor and uh yeah she's just gotta be cool I guess Fun to be around That's good Yeah So those are a good qualities So what are some of y'all biggest red flags What do you look at like Oh boy I can't go there when I'm when I'm looking at a different job Uh you got some on mine right now Let me think for a second I would say I know one of yours for sure I would say honestly uh the whole guy best friend deal bingo I mean actually I don't necessarily agree that I know what you mean Yeah But I'll explain that So basically I feel like with a whole guy best friend it's like like even if I do trust the girl right Like oh yeah that's my guy best friend They give that same naive like response every single time He's like a brother To me I would never like all that stuff at the end of the day It's like at at the end of the day It's like look I'm a guy right I know maybe your intentions are that but I know what his intentions are at the end of the day You know what I'm saying So it's like I don't always like I'm not saying like look you can't have guy best friend or whatever but it's just like I feel like having like too many and just having like you know I feel like that's a little bit of a red flag I'd also say just kind of like for girls being dry and stuff like that Like that's a bit of a red flag too But I would say the main ones like the guy best friends like if she has too many guy best friends I I can't what's the main one For sure Yeah No that's dead Really I mean it

depends on who the guy is It's just like bro like I'm not an idiot Like I know I know what that guy's intentions are Like if something goes south between me and the girl it's like I know she's gonna be the one to think Exactly Yeah exactly But there's boundaries with it though for sure I don't like there's boundaries like bro Like I mean what do you mean by best friend Like they always hang out with each other They're always with each other Like I only have like that I can think of like I only have two girl best friends It's like I know what his intentions are So it's like at the end of the day it's like yeah it's dead I don't I mean me personally I wouldn't I don't really I wouldn't have like a girl best friend I think that's weird Like my girlfriend's my best friend but like my girl my girl can be friends with guys but I let her hang out with That's different There's boundaries right Yeah Like I mean my girl has friends she grew up with like they they childhood best friends obviously bro Like I'm cool with them They're cool people Like I rock with them just like hang out with them like that No no no I mean I don't like she can hang out with them whenever that's not my decision Yeah I do It just them Ok Now Ok Now look this is different if it was Hm Jalen from the football team that's not your guy best friend you know I mean like that's totally different I mean he got I mean I'm these guys but that goes back to that uh demon athlete Uh the stereotype Ok Yes But like at the end of the day bro a girl girls girls are smart they know they know like what the deal is right I think like me personally like who my girl her friend group like they're all friends they're all so I have no issue with it I've never been like Oh no no Like I would hang out with them too Like I mean I'm gonna hang out with them soon but I think where y'all are coming from it's more so of like I don't know man I know I get what y'all are saying but I'm not as big on that as I've come across a lot of girls too that like don't even realize it you know what I'm saying Like don't think oh yeah he's like a brother to me Like I would never like whatever OK But that's your intentions But I think we know guys that's why we say it because we know how it works We know how this stuff works You know what I'm saying Like tt Yeah bro that's so you I can't do that I want like I wish I could show y'all because it's like I can't really explain it but it's not No But at the same time I want to get to that point where I could trust the girl enough to be like you could have but think about it like I know it's my parents aren't just like my mom not going to go just hang out I agree with that I agree with that because you just know what the dude's like I just feel like you know like bro for example right Maybe not you I can't really put you in this right But like because like you're loyal to the soil but white you're

hanging with a girl and it's like that thought crosses your head and you know what I'm talking about you know what I'm saying Like like whenever you're just like hanging around and it's like bro like their guy best friend that thought is crossing their head every time they hang out I didn't even think about it like that I don't like like that Like it has to be like it's not just you know that's a difficult one for me and I'm just keeping it a buck I'm just being honest Like I you know I just feel like that's what you know most because you put yourself in the guy best friend shoes Are you really gonna have like you know I don't know I love my girlfriend's friends Like they're all super cool So I have no problem with it and I want to get to that point and maybe if I get a girlfriend who you know like if I do get a girlfriend and I and I mess with their friends too then you know that's that too But I respect that you know you have that friendship with them I think it would be weird if like I never spoke to them that she has friends Like yeah like that was keeping it away Yeah That's different if she's hiding them from you and like you know you know no you can't meet them or like whatever Ok then that that's a red flag That would be But you met them So I'm gonna hang out with them during Christmas time You guys will see him at the game on Sunday Can't wait to meet him But you it's absolutely now Well she's not gonna hang out with another dude One on one She could have she could have something She's just not hanging out with no other dude Not one on one That's crazy I feel like for me but I said everybody got their own I don't know I don't know about one on one I couldn't see that happening I don't know But um childhood best friend I trust everybody Relationship different So when do you all plan on want to get married I know you rather young I know you actually y'all y'all uh me I wanna I wanna find I anytime for real once I can provide then I wanna that's I'm cool Like I if I find the girl then then that's yeah me as soon as possible Not married as soon as possible I wanna know who I'm gonna marry soon because I don't know how soon I'll be able to you know provide But yeah I agree with that sooner rather than later Yeah I would say for me like I wouldn't say there's like any set like age and stuff like that Like I mean I'm not necessarily like looking to get married like right out of college or anything necessarily but like if the right one does come my way I'm never gonna like push them away Um I also do want to be like financially like stable and like able to like create a family So like I would you know I mean I don't really have a set date on it but you know I could be 35 I could be 25 you know really doesn't like you know I mean yeah like if I find the right one I'm not gonna like push them away but at the same time I'm

not like actively like oh I gotta get married by like 24 not five You know what I'm saying Like but yeah I definitely want to be like financially like I want to be making money I wanna you know so this is interesting So y'all both bring up finance finances right Finances No no no I agree Yeah When I get married you have to make sure you have some kids I wanna have you know for sure But let me get into let me end this point So you both want to make money be financially you know stable and uh thriving prenup We've been talking we've talked about this a lot So I wanna know are y'all y'all making her sign a prenup Uh it depends I feel like it I don't know I can't tell you until I'm in that situation I can tell you right now She's signing a prenup I can tell you right now All right What's your reasoning for it I mean like I'm gonna set um probably on the spot Oh my gosh da what's my reasoning for it Should I can I give you reasoning why I I personally I I don't I don't I'm not doing because I feel like you're setting yourself up for failure like speaking something in resistance Granted I think I really believe the whole legal concept of marriage is is stupid Like personally what I believe in marriage how the Bible talks about marriage is how is different than how like our legal system is like our legal system I mean what like 50% of marriages end in divorce Like my parents my parents are divorced I know so many parents that are divorced and then on top of that you got to also talk about another 20% of marriages where people are like probably not happy with each other but can't afford a divorce can't afford to separate because of the kids or whatever So they're separated living at home So it's like 75% of how the structure of it is set up is dumb But personally I don't I would not sign a prenup just because I don't know I feel like it's bad Juju Do you want to explain what bad Juju means Because I didn't know what that meant for the first time You said that to me Bad Juju Bad Juju is like um what is it It's just like I don't know what bad energy Yeah bad energy Like it's you're putting bad energy out there like like it's like it's like leaving the gym on a miss That's bad I would say for me I was thinking about that while you were answering and I think it's a good answer I would say for me like the whole reason why I would have someone to sign a prenup is like look I'm a lover boy just like you I love you know I love hard stuff like that Like you know but at the end of the day it's like I'm gonna work hard for my money and like at the end of the day you don't know what another person's thinking as much as that that could be your soul mate that you know whatever you don't know what's going through another person's mind Now I'm not saying like you know I'm not insecure about that necessarily or whatever but it's just like that

hard earned money is one thing and then like I feel like you know you're in love for somebody somebody else I'm not that doesn't mean I don't love you any less That doesn't mean you know like you know we're we're still good you know whatever I I if we were to somehow break up get a divorce or whatever I'm still gonna like take care of you If I have a lot of money and stuff like that Like you know So I mean yeah that's that's how I'd answer it I see both ways I get what you're saying like talking about speaking into existence So it's like why would we even sign that thinking like oh we might get divorced But then I also see his point because a lot of people are good at playing the role too So you don't even know and even if they are playing the role you never know what could happen you never know Like I mean yeah but like it's and it's sickening to think about too like bro but like uh Aaron we was just talking about what Aaron he was on that Wait what happened Explain that So he went on this date with this one of the g he's seen that uh I don't know how it happened I don't know the full story or whatever but when they were together at the date he's seen on her phone like the last thing she's looked up on safari or whatever was like Aaron Gordon's net worth Like that's what she's thinking about going into the thing That's what I'm saying Like she might yeah it's like I can see why people think like a lot of a lot of this a lot of people a lot of guys might think like oh a lot of girls are just in it for the bread and stuff Like that So you know I don't know I it's tough it's a tough question because maybe my mindset maybe when I do get married my mindset is completely different Like no we don't need to sign up prenup But I mean you talk about the sunset prenup right Yeah Sunset prenup It's like kind of when um like you're married for a certain amount of time like if you're married for 5 10 years whatever it may be like that prenup kind of like fades away So there's that too Um but I don't know It's it's definitely it's a great question but it's something that like you know right now I'm saying yes she's definitely signed for But you know maybe when I get married you never know So I don't know Yeah I don't know I just wish our marriage system was different because obviously it's not working Granted I mean I want to have a big wedding Do you all want big weddings You don't want a big wedding I want I just want my close circle there My people's her people It's gonna be straight But I don't need a bunch of people Mine is still gonna be lit but I'll need a bunch of people there that like I don't haven't talked to in forever Like just some people I haven't talked to since eighth grade You guys gonna be at my wedding Yeah But that's what I'm talking about Like we all are you all gonna be in mine but it's like tight circle for me Yeah I feel you

you're gonna use I was gonna be late Like what Yes bro Wait what's a big wedding Like how many people I don't know But like I mean I don't I don't know the numbers I'm not uh I love weddings Like I've been to a couple of weddings I have fun Um it's a lot of fun seeing weddings but I don't I don't know I just want a lot of people there Like if you're a far far relative please come Like if I talk to you once in my life you can come to the wedding But also I think it'd be cool to have like a destination wedding Granted depending on where I get married A destination wedding is like where you go like you go somewhere else and the wedding is like if I was to go to Italy and get married in Italy if I was to get married in Italy then that'd be the then everybody got to come travel there But I don't know I think a big wedding would be fun No I agree I totally agree Especially like let me ask you this I mean it's your moment you know what I mean You gonna let me talk at your wedding Absolutely not But why is that why is that why cant I talk at your wedding Who's gonna talk at my wedding I let my dad talk I mean you can talk to my wedding I'm your best friend Why can't I talk at your wedding You could talk at my wedding but why'd you say no originally Because you have no filter Alright that's you know like there's gonna be a lot of people there there is you know what I mean But Cadence knows as a matter of fact she not it's not my decision she not letting me talk at the wedding You know the cadence I know you're gonna let me talk at the wedding like you can you can Yeah I'm gonna stand up and do that Can I talk to you OK Uh Yeah you can go ahead I who's gonna be your best man You probably Yeah my brother my brother both y'all both y'all gonna be up there I'll probably have my dad you know you know how the ring bearer both of y'all are gonna be behind the man Yeah whatever it is Yeah No Yeah I already got about because I already have four brother five brothers So I already got five right there from a big family Seven well yeah three sisters four brothers a brother and I so five brothers and three sisters That's dope though Having such a big family and stuff like that Like it was crazy like the ones battles It wasn't ones it was two you have to do Yeah No it was crazy It was a lot of fun though Like I wouldn't want it any other way But it was crazy because we was all homeschooled until high school too So we was all at the c did get annoying after a while You get frustrated I mean there's times I would get annoyed with one sibling but then it's like you get annoyed with one sibling there's six others So it's like if you get annoyed someone and then you cool but then you're cool But then you got what's up bro Yeah exactly But then you're cool with him the next hour So it's just like yeah no it was a lot of fun I feel like

that's also like us living together It's like I love like you guys are my brothers I love you guys together But it's like living together every single day It's like we get in fights all the time It's like you know it's like we fight it's tough I mean like but I I wouldn't have it any other way I love living with you guys and stuff like that But there's times where you know I want to take your head off sometimes you know like you piss me off sometimes but both of y'all but you know you have one sister Nora Nora Shout out to Nora shout out to Nora What was it like growing up with her She was cool I mean so when we were younger we used to fight like all the time Like it was always like you know competing for something attention whatever it was But like I feel like as we got older like I started to realize that she was really like my built in best friend and like we would tell each other everything and like especially since I moved to California like she calls me all the time and stuff like that And that's really like that's really my dog I love her So I mean like as we got older and like matured it was like you know we we became a lot closer and even when we were fighting it was always like you know you have love for them but it's like you're always like fighting like when you're younger and stuff like that But yeah that's my that's my best friend me and me and my middle sister We we we used to fight a lot when I was younger on my mom's side But I mean I grew up with three younger sisters Um So yeah I feel like that's basic human nature You fight with your siblings Like that's just did you want a brother I mean like yeah yeah I feel like it would have been cool having like either an older or younger brother but I can never fight my sister You know what I mean Is always gonna take like always bro And that was always a good lesson I think too because it was like you know that this is how you're supposed to treat girls like that You're not supposed to like you know hit your sister like or you're not supposed to like because I was like eight and she was like six years old and we would like play fight and not like too rough with her And so and then it's like you know it's like you know your dad's always getting inside with the sister and that's you know you liked having brothers though You like having a I'm glad I got both though Like I can experience both It's like each relationship is I mean all of them are the same but all of them are different too you know You know But yeah everyone in the family is super close I put you on the spot Who who are you closest with Uh I can't really say there's like we're all it's crazy how close Like we're all always talking about that but it's like kind of like Paris It's like Brey Mike ta Miko Isaac Jada But then it's like they would all growing up they'd always make us be like who's your best friend And I would have to

say Kan would have to say you all have to say your pa but no all of us are like what was it like How much did you all eat bro It was going through that house that's growing up Were all vegan growing up the whole time Vegetarian vegetarian they're all vegetarian So it was crazy I don't know how my mom did it how my dad did it but they found a way That's crazy And y'all are all kind of close in age too Yeah I'm trying to think So Who's Bree's the oldest the oldest How old is she Like she like 28 and Bree has Kai she's like 28 Yeah And then Jade is 15 So yeah that's eight kids within 13 years And then Bree yeah she has a child now Kai kai Shout out Kai shout out Kai Man Shout out kai No Yeah he's huge He is bro He's gonna be so he's gonna be very because she's like 6263 and Reese is like I think like 6364 somewhere around there But we're like the environments in high school like growing up with Yeah Honestly let me talk let's talk about that Like growing up watching because you have how many how many of them are older We Fox You have five older Whoa So what were their high school games Like like I know you said all these were lit No B and C their games for like especially in Columbia like now or when I was back in high school like going to the girls games none of the girls' games would be lit But growing up like Bre and CS their team was I think they were like top five in the nation or something So all their games would be sold out lit and then Michael and John said like their games were stupid li and then when we went to seat at Nathan Hale Mike Cob and uh John when were you in Seattle My I believe that was my seventh grade year So you were in Columbia And then you moved to Seattle Yeah Well I was in I was born in Indiana moved around there then moved to Missouri Yeah I went to Seattle for a year That was a crazy year Like I like Seattle a lot So I was on the west coast like one year and it was it wasn't even a full year actually But yeah that was crazy I mean they didn't lose a game that year Right I think the year before they only won like a couple of games like one of the worst teams in the city And then the next year we I remember watching them when I was in like eighth grade like oh my God I remember that Mike and PJ Fuller was on that team He was a freshman you know on that team I was on that team He was a freshman but he was he was he was still like super good at that time but he didn't even get in the games that much because they only they only had like a six man rotation It was crazy Mar they were so good I remember I remember watching that You like 7th 8th grade Like me and my boys would watch those all the time on youtube Those games would be that's crazy Especially when they play like Garfield with uh oh yeah there was or they play where

the beach games Beach with Kevin Porter Everybody always thought we were related They thought we were Yeah Kevin Porter they thought was related with Kevin He was a bucket bucket your high school games for those watching he I 30 points a game in high school So that was fun It was lit I mean 30 a game is ridiculous bro 30 a game High school was cool I mean like because you played you started as a freshman in high school I started as a freshman I mean how much your freshman year My freshman year I averaged like 11 and then what you average My sophomore averaged like 20 then my junior year we didn't have a junior year We had like three games Do you think he would have broke the scoring record in the state I don't think I would have broke the scoring record in the state because Dewan Wagner but I definitely would have cracked two K for sure I mean I think I finished at like 1700 So like if I had a junior year which is like one of the prime years like if I had a junior year I definitely would have had 2000 So I mean yeah high school was cool though I mean you know Yeah that was fun That was a lot of fun Yeah bro High school is high school actually Now that I think about another world it was fun That's what a lot of stuff like though It would be like in the moment you feel like it sucks You looking back on it to get to college and you're looking forward to the whole college and stuff like that And then once you get to college you like look back and you're like whoa high school was like you know like we talk about our high school stuff all the time I mean I'm super close to my I'm super close to my high school coach I talk to I talk to him all the time I feel like that's life in general though A lot of people like like me especially I'm always like in the moment I'm like man this sucks whatever but like instead of really fully appreciating where I'm at and once you get in the future you look like back like man that was so I I think I told you this the other day too It's like you know you're probably going to be in the NBA within the next year or two Like I told you this the other day though like you got like really appreciate where you're at too though And like kind of like live in the moment because you're gonna get to the league and then you're gonna be like you know college was fun I made a lot of yeah But like you said that's life It's like you you know you get to one point in your life and you look back and you're like man that was a fun time High school is just way more in the same Yeah like it was just I feel like everything was easy I feel like no one had had intentions in high school Basketball was easier I think basketball was basketball was just I don't know bro like I mean coach I mean my coach we did scout and all that stuff and I came from two pretty good but you can't like there's not enough film It's like

you're watching on huddle like a couple of games give us like a packet in high school and like all this is scouting report Like this guy can shoot this guy you know whatever So I need to shoot we will watch film But III I would just be in there like it's wait because in college you got to be locked in a high school I'll be locked in But it's like somehow when you're playing a team like especially where I'm from like a small town with like 2000 kids and it's like all little 6 ft dudes It's like I'm not in film I just want to say that we talked about this but there's no feeling or no way to describe like that ball going through the net It bro it actually is kind of crazy now I think about it and that's not my that's not my favorite part about basketball but it's just funny to think about it I think my favorite part about basketball is like my teammates like in just the process of seeing like got like your development and you've developed crazy from when I first met you when I first saw you like just seeing the development like that um in the process of it and like Max's development like you that's what really made me emotional get drafted because like seeing coming in with him as a freshman obviously supreme talent but did not care at all about like the little things but like you could see how good he I mean he was he wasn't allowed to play like the first couple of games so he'd be on scout and he'd be killing us like just off he'd love to IO and it seem like I mean I think that's the craziest um jump in uh like ability and transformation that I've ever seen in my life from like one year to the next next year I mean the dude through I mean he averaged what 1718 game last year and through like the first what 15 like right before conference the dude was averaging he was averaging close to 20 on like 50 50 50 or like it's not like he was just like he was making like tough passes too Like I'm like oh my Lord I'm like this dude is it was after the first game I was like dude I remember that 29 on 15 shots 1215 in the field that's guarding guarding him in practice was crazy He's one of the toughest dudes like his length and his first step Like when he can jab and shoot you know he can shoot that was hard to guard He's one of the funniest people out to Max last year was fun bro This year is a really good year too though I messed with the with the scar we got this year I can't wait to be back out there with y'all soon A couple of days Alright soon you back probably back I love basketball bro But man just seeing like it it is kind of crazy bro because like now talking to Max and like how much he's matured even just being in the league it kind of goes back to what we were saying about You just have to be um you know just be where your feet are and it's like the hardest thing in the world because it's like dang like I can't wait for this I can't wait for that And

that's really what I thought in high school But now looking back on it I'm like I wish I would have appreciated more things in high school Like bro did y'all go to prom Yeah I did Really You don't even remember bro I never went to prom I just didn't you never got invited or you never like what was the deal I'm not gonna lie bro Like I was I was really weird in high school I still I still am pretty weird but I was always weird my freshman year especially I I was at a different school than when I transferred but I was really like kind of quiet had my headphones in and I I mean I was like 5 10 100 and £30 in my freshman year And I had like shout out to Ryan and Jaden Law So like I was really close to them my brothers but other than that and the twins but other than that I didn't like I was kind of by myself a lot So I went to one school dance my freshman year and then after that maybe went to like one I think throughout the rest of high school when I went to the new school So um maybe two if that But yeah I never like I never went to prom you know like and I feel like those are things you should appreciate I don't know the reason I didn't go to prom is it got canceled my junior year because of COVID I probably wasn't gonna go regardless But then my senior year the day we graduated I had to drive to Pepper Nine because we had practice The next day I like walked off the stage graduation and I just jumped on a plane I remember first meeting you jumped on a plane Got right here I remember first meeting this guy bro in the room in the room at seaside And I was like oh boy it's crazy Like because my room my freshman year was crazy Or sophomore summer was hilarious It was me and him and court in the same room And then Mike and Max in the same room with Yan in the other room He had his own room I remember coming in I was like I didn't even know who I was gonna be cool with I'm coming here to hoop like whatever And then like like I don't know bro we just got so close to that bro And then like the greatest part about that summer was the water balloon fights the girls volleyball team That was so much fun We end up actually we shouldn't probably talk about that but I wouldn't care It just got shut down shut down That goes back to what we were talking about like times like that like it was just fun and now you don't realize it Like bro I was singing especially with Max and Mike Shout out Mike Mitchell doing everybody out shout out Mike you know sing at uh at Minnesota right now miss you But like especially us for like we all lived together in a 15 last year Shout out to 8 to 815 Didn't mess with us back then but you guys did not mess with me But even seeing like where Max is at now and then where Mike's at now and like guys I came in with um and was with like Jayo and Mao and Carson you know and them

not being here and it's like I was with all those guys for two years and you don't realize it because you're like bro we're gonna be here forever and that's kind of in my mind like another day you know but like the days end up stacking and then it's also crazy with you Like you I mean me and Vaughn have been here for this is our second year You've been here three years Like you've seen so many people come and go you've seen so many people like you know people that's weird like even like on the basketball team on on different sports teams too like on the girls basketball team like everything is just like you've seen so many different people come and go It's so weird especially like with Marley like how close I was to her last year and like yeah bro life hits you fast But yeah we were your feet or s it does hit you fast man I appreciate you guys coming on today Oh that's it We're done or about that time Um You know it was good talking to y'all Y'all gave great wisdom So I appreciate y'all coming But um once again like I said it was a good episode three Good talking to my guys uh Jon Porter and David Major And once again I just want to thank studio place and uh Twin Bridge Sports for making this happen So until next time episode three is now done until episode four
